Nationality: Azerbaijani | **Phone number:** (+994) 104142624 (Mobile) | **Email address:** saidmuradkhan414@gmail.com | **Website:** saidmuradkhan.dev | **LinkedIn:** Said Muradkhan | **GitHub:** saidmuradkhan | **GitLab:** saidmuradkhan414 | **Address:** Baku, Azerbaijan (Home)

ABOUT ME

Python and Django developer. I build REST APIs with Django REST Framework (JWT authentication, filtering, per-user data), PostgreSQL databases, background data pipelines and well-tested code with pytest and CI on GitHub Actions. My Django + React app jobtrack has 133 backend tests and integrates my own FastAPI and Go services; az-job-radar is an async Python scraper and FastAPI analytics API with 98% test coverage. I am a Computer Science student at Khazar University and a Full-Stack Developer at Leops, where I work on production web applications with PHP/Laravel, React and MySQL. Portfolio: saidmuradkhan.dev

WORK EXPERIENCE

FULL STACK DEVELOPER – LEOPS – 09/01/2026 – Current – BAKU, AZERBAIJAN

Spec-Taxi: internal management system (db.spec.taxi), Jun 2026 – Present
• Worked with the engineering team to design, build and release the new version of the platform.
• Developed front-end and back-end features based on requirements from the operations team.
• Refactored legacy code and fixed critical bugs, making the system faster and more reliable.
Assetra: asset and inventory management system (team project, in progress), Jul 2026 – Present
• Building a new inventory management product (React front end, Laravel back end).
Leops corporate website (leops.az), Jan 2026 – Present
• Built and deployed the company website end to end: responsive UI, back-end logic and dynamic content.
• Maintain the site in production: performance optimization, bug fixes and security updates.
Across projects
• Integrated REST APIs and optimized slow database queries.
• Handled server deployments, environment configuration and production troubleshooting.
Stack: PHP, Laravel, JavaScript, React, MySQL, Git, GitLab CI/CD

PROJECTS

19/09/2026 – 28/10/2026

jobtrack: Job application tracker (Django + React)

A full-stack job application tracker: browse vacancies from 10 Azerbaijani job sites, save them and track each application from "applied" to "offer" on a list or a drag-and-drop Kanban board.
• REST API with Django REST Framework: JWT authentication, per-user data isolation, filtering, search and ordering.
• Integrates two of my other services: vacancies from az-job-radar (FastAPI) and salary conversion to AZN/USD with official rates from cbar-rates (Go), with caching.
• Email-driven status updates: a webhook receives forwarded job emails (Cloudflare Email Routing), classifies them in English, Azerbaijani and Russian and moves the matching application forward automatically.
• 133 backend tests (pytest-django) and 37 frontend tests (Vitest), run in GitHub Actions; PostgreSQL on Neon with automated migrations.
Solo – Python, Django, Django REST Framework, JWT, PostgreSQL, React (Vite), pytest, Vitest, GitHub Actions, Vercel

03/10/2026 – 23/10/2026

az-job-radar: Job vacancy scraper and analytics API (Python)

An async scraper and data pipeline that collects vacancies from 10 Azerbaijani job sites every 3 hours, analyses each ad and serves the results through a FastAPI REST API and a dashboard.
• Concurrent scraping with asyncio and httpx, respecting robots.txt and a 1 request/second limit per site.
• Text analysis extracts category, skills, languages, experience, seniority and work mode; duplicate ads across sites are grouped by normalised company names and title similarity.

• Scheduled pipeline on GitHub Actions writes to PostgreSQL (SQLAlchemy, Alembic migrations); about 900 vacancies per run.
• Tests run offline against saved pages; 98% coverage, with a CI gate at 85%; linted with Ruff.
Solo – Python, asyncio, httpx, BeautifulSoup, FastAPI, SQLAlchemy, Alembic, PostgreSQL, pytest, GitHub Actions

25/09/2026 – 19/10/2026

cbar-rates: Exchange rate microservice (Go)

A Go microservice that fetches the official daily exchange rates of the Central Bank of Azerbaijan (CBAR), parses the XML feed and serves it as a JSON REST API with a currency converter page and a 30-day history chart.
• Endpoints for current, historical and converted rates; weekends and holidays fall back to the last working day.
• In-memory cache with TTL, stale-on-error serving and request de-duplication; automatic fallback to a second rate provider when CBAR is unreachable.
• Per-IP token-bucket rate limiting (429 + Retry-After), graceful shutdown, structured JSON logging with log/slog.
• Unit and HTTP tests (testing, httptest) with ≥80% coverage enforced in CI (gofmt, go vet, go test -race).
• Multi-stage Docker build into a ~20 MB distroless image running as non-root; deployed on Vercel.
Solo – Go (net/http, encoding/xml, log/slog, embed), Docker, GitHub Actions, Vercel

07/08/2026 – 28/10/2026

PassIn: Offline password manager for Windows

A keyboard-first, offline password manager for Windows 10/11: a global hotkey opens a quick search and copies or auto-types credentials into the active app.
• AES-256-GCM encryption and PBKDF2 key derivation through Windows CNG, called from a small C++ core that keeps keys out of the .NET heap.
• Built-in TOTP authenticator, password generator, recovery key, auto-lock, and a clipboard that is excluded from Windows history and cleared automatically.
• CSV import from Chrome, Edge, Firefox, Bitwarden, LastPass, 1Password and KeePass.
• Released with an installer and auto-updates verified by SHA-256; CI/release pipeline on GitHub Actions, winget manifest.
Solo – C#, .NET, WPF, C++, Windows CNG, Inno Setup, GitHub Actions

26/06/2026 – 06/08/2026

iTicket clone

Event ticketing platform modelled on iTicket.az: event search and filters, interactive seat map, cart with countdown timer and a user profile with tickets, orders, wallet and refunds. Real card payments via the Payriff API through a Node.js/Express service that keeps the secret key server-side and verifies payment status with Payriff; Google sign-in, multi-language UI and dark mode.
Solo · React, React Router, Context API, Node.js, Express, Payriff API

Link https://github.com/saidmuradkhan/Iticket

07/06/2026 – 13/08/2026

Zenvolt – E-commerce store

A responsive electronics store for a fictional Baku shop: search, category filters and sorting synced to the URL, product pages with specs and related items, a persistent cart drawer and wishlist, and a validated checkout flow with order confirmation.
Solo · React, React Router, Context + useReducer, Tailwind CSS, localStorage

Link https://github.com/saidmuradkhan/ecommerce

02/05/2026 – 03/06/2026

Carify clone

Car import and shipping site modelled on carify-global.com: car catalog, shipping cost calculator, shipment tracking with Google Maps, wishlist, authentication and multi-language support.
Solo · React, React Router, i18next, Axios, Google Maps API

Link https://github.com/saidmuradkhan/Carify

22/07/2026 – 03/09/2026

Amber Lounge – Cocktail discovery app

A cocktail discovery app with a dark, amber-lit lounge design, powered by TheCocktailDB API: debounced search by name or ingredient, category and A–Z browsing, full recipe pages with ingredient thumbnails, favorites and a validated reservation form.
Solo · React, React Router, Axios, Tailwind CSS, REST API

Link https://github.com/saidmuradkhan/cocktail

29/09/2026 – 10/10/2026

Portfolio website

Personal portfolio built with React and Vite, with server-side prerendering for fast loading and SEO, smooth scrolling and light/dark theme. Deployed on Vercel.
Solo – React, Vite, CSS, Vercel

Link https://saidmuradkhan.dev

EDUCATION AND TRAINING

15/09/2024 – CURRENT Baku, Azerbaijan

COMPUTER SCIENCE Khazar University

Level in EQF EQF level 6

11/11/2025 – CURRENT Baku, Azerbaijan

FULL STACK WEB DEVELOPMENT Div Academy

Intensive full-stack programme: React, Tailwind CSS, Node.js/Express, REST API design.

Final grade 98/100 (in progress)

SKILLS

Back-end Development | Front-end Development | Web Design & Web Development | Cloud: Firebase, Heroku, Vercel

Programming & Databases

PHP | Laravel | JavaScript (ES6+) | React | Node.js | Express | REST APIs | HTML5 | CSS3 | Tailwind CSS | Bootstrap | SQL | Python | C++ | Java | MySQL | PostgreSQL | Go | Django | Django REST Framework | FastAPI | C# / .NET (WPF)

Tools & DevOps

GitHub | GitLab | Git | CI/CD (Gitlab CI) | Docker | Composer | Visual Studio Code | npm | Django ORM | Alembic | Vercel | pytest | Vitest | JWT | REST API design

LANGUAGE SKILLS

Mother tongue(s): **AZERBAIJANI**

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
TURKISH	C2	C2	C1	C1	C2
